Features & Benefits

• The CP3525 contains the new Secondary Cleaning System Technology (SCS), which keeps the PCR totally clean of toner additive throughout the complete life of the cartridge. This eliminates many historical issues in print defects such as streaking, dirty print, and backgrounding.

• MSE designed the SCS to be scalable to virtually any color (and even monochrome) cartridge. This technology will allow our customers to start grabbing some share from OEM customers, seeking true alternatives to the very costly OEM cartridges.

• CP3525 family printer is HP's leading offering for the SME market (Small and medium sized business) and it replaced the very popular HP3600/3800 printers.

• MSE as always approved this product using the markets most exhaustive testing protocols including; environmental stress testing, accelerated aging testing, shipping simulation, and ISO 19798 testing.
